Education

Xi’an Gaoxin No.1 High School | International Course Center 2024.09 - Present

- **Top 5% in grade-level ranking**
- **AP Scores:** Biology 5, Calculus BC 5, Chemistry 5, Physics 1 5, Microeconomics 5, English Language and Composition 4
- **Standardized Tests:** TOEFL 115, SAT 1520

Academic Experience

John Locke Essay Competition | Research on Discount Rates in Environmental Policy 2026.05 - 2026.06

- **Explored the selection of discount rates in long-term environmental policies and its influence on intergenerational equity.** Analyzed governments’ trade-offs between current-day economic development and future environmental damages from economic and ethical perspectives for climate-policy reference.
- Read and reviewed **over 15 English-language papers on economics and environmental policy,** summarized major academic viewpoints on social discount rates, and conducted comparative analysis based on cost-benefit economics and intergenerational equity.
- Independently completed an approximately **2000-word English research paper.** Based on literature evidence, I analyzed how high and low discount rates affect the valuation of future environmental harm, and suggested adopting relatively low discount rates adjusted for different policy scenarios.

ISLP Statistical Poster Competition | Research on the Bird Collision Avoidance System 2026.05

- **Assessed the practical effectiveness of BCAS in reducing bird-strike accidents.** Analyzed the technology’s application value with public airport and aviation-safety data to support airport bird-risk management and aviation safety.
- Collected and sorted **public case data from Singapore Changi Airport, Aalborg Airport in Denmark, the U.S. Air Force and other sources.** Compared changes in bird - strike incidents before and after BCAS deployment, and analyzed risk - prevention performance of radar, infrared and intelligent early - warning technologies.

- Created **four statistical charts** and a full academic poster using processed data, and compared trend differences across airport cases. Received **First Prize in the High-School Division.**

CTB Global Youth Research and Innovation Conference (Team Captain) | Social-Science Research 2025.11 – 2026.03

- **Studied how information asymmetry, risk perception and market norms shape consumers' exotic – pet – keeping decisions.** Examined discrepancies between market demand and real – life raising behaviors to provide evidence for higher market transparency and better regulatory management.
- Led a **three – member team** to finish the full research design. Reviewed **23 Chinese and English papers**, designed and distributed **more than 100 questionnaires**, and held **two in – depth interviews** to gather primary data on consumer attitudes, information access and risk perception.
- Interpreted consumer decision – making factors using literature, questionnaire and interview results. Identified insufficient information and loose market regulation as key obstacles preventing potential demand from turning into real – world ownership. **Completed a 10000+ – word research paper and advanced to the National Finals.**

CTB Global Youth Research and Innovation Conference | Social-Science Research 2024.11 – 2025.03

- **Researched information gaps in young people's pet purchase and adoption and their connection to pet abandonment.** Explored feasible solutions using pre-consumption education and screening mechanisms to lower impulsive pet acquisition and abandonment risks.
- Served on a **seven – person research team.** Administered over **200 questionnaires** and ran **offline science – popularization events for over 100 participants**. I also interviewed pet stores and investigated pet – raising procedures to locate major information gaps regarding pet knowledge, raising responsibilities and decision – making information.
- Improved pet purchase and adoption workflows by **adding client assessment and pet – care education modules**. Completed a **20000+ – word research paper and obtained qualification for the Global Finals.**

Extracurricular Activities

MJ Science Popularization WeChat Official Account | Lead Coordinator (since Mar 2026) 2025.08 – 至今

- Worked to lower barriers for public science knowledge and raise teenagers' awareness of mental health, natural science and science in daily life. Oversaw overall content planning and

release, and **supervised the creation of more than 60 popular-science articles covering psychology, physics, chemistry and other subjects.**

- Coordinated the full workflow including topic selection, source review, content editing and publication, and guided the team for steady content output. **The account has accumulated roughly 500 followers. Its best-performing post earned around 6000 likes and 300 shares.**

Bird Collision Action Network | 2026 Spring 2026.04 - 2026.06
National Bird-Collision Survey

- Volunteered for the national bird-collision survey to collect first-hand data for bird conservation and urban biodiversity research. Joined this national project with **8000+ volunteers across 186 cities, jointly recording more than 1700 bird-collision events.**

Cornell University Biodiversity Course 2026.04 - 2026.05
| Bilingual Course

- To address high-school students' limited understanding of bird-collision issues, I designed a bird-collision survey workshop for high-school students. It integrated bird-collision science outreach, survey-skill training and field investigation, and explored citizen-science education methods to engage teenagers in biodiversity conservation.

Documentary Project at Qinling San-Guan-Miao Conservation Station 2025.08 - 2025.09

- Used video to explore the balance between ecological conservation and local community livelihoods in the Qinling Mountains. I completed one-week on-site filming and interviews at the conservation station, documenting station operations, local livelihood transitions and real conservation practices.
- Produced a 15-minute documentary incorporating interviews with staff and local residents as well as biodiversity and insect surveys, to spread awareness of Qinling ecological protection among young audiences.

Popular-Science Illustrations of Rare Chinese Animals 2025.10

- Created educational infographics for species including the Chinese sturgeon, black-necked crane and snow leopard.

Honors & Awards

- First-Class Scholarship, Xi'an Gaoxin No.1 High School (top 1.5% of grade)
- Two Third-Class Scholarships, Xi'an Gaoxin No.1 High School (top 2.5% of grade)
- Total scholarship grants: approximately RMB 40,000
